-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30days MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

- 6) ☐ Other: \_\_\_\_.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to a charged particle beam apparatus using beam shaping means as an aperture for switching the operation between the SEM providing serial imaging and SEEM providing parallel imaging, classified in class 250, subclass 310.
- II. Claims 4-12, drawn to a charged particle beam apparatus using an objective lens for switching the operation between the SEM providing serial imaging and SEEM providing parallel imaging, classified in class 250, subclass 396R.
- III. Claim 13, drawn to a method for operating a charged particle beam apparatus in a serial imaging mode SEM, classified in class 250, subclass 307.
- IV. Claim 14, drawn to a method for operating a charged particle beam apparatus in a parallel imaging mode SEEM, classified in class 250, subclass 307.
- V. Claim 15-18, drawn to a method for operating a charged particle beam apparatus in a parallel imaging mode SEEM and including a light beam provided by PEEM, classified in class 250, subclass 251.
- VI. Claim 19, drawn to a method for operating a charged particle beam apparatus by controlling a working plane of an objective lens, classified in class 250, subclass 396R.

The inventions are distinct, each from the other because:

Inventions I, II, III, IV, V and VI are distinct, each of the inventions I, II, III, IV, V and VI recites the limitations not recited in the other invention. The differing limitations make the inventions I, II, III, IV, V and VI patentably distinct from one another, i.e., a reference that

Art Unit: 2881

anticipates or makes obvious one of the inventions I, II, III, IV, V and VI would not by itself anticipate or make obvious the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Keith M. Tackett on 03-18-2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kiet T. Nguyen whose telephone number is 571-272-2479. The examiner can normally be reached on Monday-Friday from 8.00 AM to 6.00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John R Lee, can be reached on Monday-Friday. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
